NCI Technology Transfer Ambassador Program – PI Approval Form

Dear Principal Investigator,

By signing this form, you indicate your support and approval of the Applicant,
to apply and participate, if selected, in the NCI Technology
Transfer Ambassadors Program (TTAP).

NCI TTAP is designed to enhance engagement between the NCI Technology Transfer Center (TTC) and researchers at the NIH. TTAP Ambassadors will be expected to spend approximately 5-8 hours each week meeting with TTC staff, learning about technology transfer, helping support the advancement and commercialization of NIH technologies, and helping increase awareness of technology transfer and the commercialization tools available to NIH researchers.

Examples of activities in which Ambassadors might participate include training workshops, drafting marketing summaries for NIH technologies, and assisting the TTC with evaluation of NIH technologies contributing to patent, invention development, and marketing related decisions. The Ambassadors will be expected to monitor their own participation in the program and to balance their commitment with existing obligations to their research.

PI: Please review and sign this agreement if these terms are acceptable.

(TTAP Applicant) has my support to
apply and participate, if selected, in the NCI Technology Transfer Ambassadors
Program.
