

## Events

At numerous events throughout the year, TTC's Technology Analysis and Marketing Unit proactively engages companies, entrepreneurs, investors, and biotech stakeholders interested in commercializing technologies and spurring economic development. We enjoy learning more about their goals, identifying areas of mutual interest and sharing the benefits of working with NIH as a technology development and commercialization partner. We are interested in talking with you. Please reach out to schedule a time to meet at an outreach and partnering event, or to [set up an online meeting with us](#).
